#### PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

#### Sample VVS Blend - Love Potion

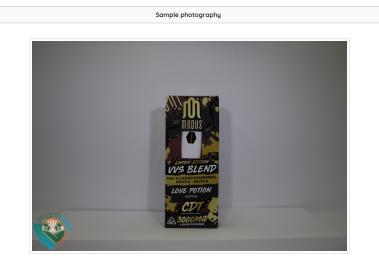

Sample ID SD230524-038 (60865) Matrix Concentrate (Inhalable Cannabis Good)		Matrix Concentrate (Inhalable Cannabis Good)
Tested for California Diamond Distribution		
Sampled -	Received May 23, 2023	Reported May 30, 2023
Analyses executed CAN+		Unit Mass (g) 3.0

Laboratory note: The estimated concentration of the unknown peak in the sample is 1.89% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannobinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and 9-THC and 9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and 9-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 concentration is estimated to be: 74.85%

#### CAN+ - Cannabinoids Analysis

Analyzed May 30, 2023 | Instrument HPLC-VWD |Method SOP-001 The expanded Uncertainty of the Cannabinoid analysis is approximately ₹.806% at the 95% Confidence Le
